## Experience

### The Medical Export Group

Documentalist

**March 2019 – April 2020**

Vuren, The Netherlands

- Devised and implemented methodology for a user-friendly document management system using Dynamics 365 Business Central, which is an enterprise resource planning (ERP) application made by Microsoft.
- Coordinated team of three in a four-month project to update old documentation
- Built program that created draft emails based on information extracted from the database to fully automate document requests
- Optimized routine document management and designed user instructions, reducing time cost for routine document management by ~95%
- Oversaw initial transfer of documentation to the new ERP system

Used technical skills: Excel, Python, GitHub, Dynamics NAV.
