(view live) (view code)

Experience

The Medical Export Group   **March 2019 – April 2020**
Documentalist   *Vuren, The Netherlands*

- Devised and implemented methodology for a user-friendly document management system using the Microsoft Dynamics 365 Business Central ERP application
- Built python program that sent document request emails based on information extracted from the ERP database which fully automated document requests
- Coordinated team of three in a four-month project to update expired and missing licenses, certificates, and product information documents
- Created several small applications to automate repetitive tasks and designed user instructions for them, reducing routine document management time cost by ~95%

Used technical skills: Excel, Python, GitHub, Dynamics 365 Business Central.
